Data Science graduate with experience in Python, SQL, and DevOps practices for automating and maintaining data pipelines. Familiar with Airflow and Spark, and skilled in data processing and cloud-based data solutions to support analytics and business insights.

WORK EXPERIENCE

Data Engineer

Apr 2024 - Jul 2025

ConsensysAI (Singapore)

Remote

Project: Consensys World

Description – a platform analyzing millions of consumer reviews for global market insights.

Responsibilities:

- Processed and transformed around 1 million crawled product reviews per week using Python and Pandas, producing clean, structured datasets for downstream sentiment analysis.
- Developed LLM-based sentiment and topic extraction pipelines using OpenAI APIs, improving accuracy and contextual understanding by 30% compared to pretrained models on Hugging Face.
- Developed and ran multi-process web scraping scripts for markets including the US, Brazil, and Australia, collecting 10K–20K review pages per day using Playwright, and Requests.
- Enhanced scraper resilience by introducing retry mechanisms, proxy rotation, and CAPTCHA-solving to maintain consistent data flow under high traffic and site restrictions.
- Collaborated with product leadership to define data coverage requirements and delivery timelines aligned with client insights goals.
- Supervised a 4-member crawling team, assigning tasks, reviewing code, and tracking weekly progress to ensure on-time data delivery.

Key Tools: Python, Pandas, Playwright, BeautifulSoup, Requests, LLM APIs, Git, AWS S3, Linux CLI

DevOps Engineer

Jul 2023 - Mar 2024

OPSWAT

Ho Chi Minh City, Vietnam

Product: MetaDefender Core

Description – enterprise malware detection and file sanitization engine.

Responsibilities:

- Used AWS services to replicate customer environments, enabling accurate issue tracking and reproducible testing.
- Built and maintained automated CI pipelines in Jenkins and TeamCity, streamlining code integration and deployment processes.
- Maintained a local Kubernetes cluster and deployed testing and development environments to ensure stable and reproducible workflows.
- Maintained and enhanced Python-based performance testing tools, monitoring throughput and stability for critical processes.
- Collaborated with international teams to transfer responsibilities and ensure continuity in resolving customer-related issues.

Key Tools: AWS, Terraform, Jenkins, TeamCity, Docker, Kubernetes, Python, Linux, Git

EDUCATION

Bachelor of DATA SCIENCE

Sep 2019 - Jun 2023

University of Information Technology - VNUHCM

GPA: GPA: 3.3/4.0

NATURAL SCIENCE specialized class

Sep 2016 - Jun 2019

Nguyen Thi Minh Khai High School for the Gifted

GPA: GPA: 3.3/4.0

SKILLS

Data Engineering: SQL, PySpark, Apache Airflow

AWS Cloud : S3, EC2, RDS, Lambda

Programming: Python, Bash Scripting, Git

CERTIFICATIONS

IELTS 6.5 

Nov 2022

AWARDS

Consistent Academic Excellence Award

Aug 2019

12 consecutive years as an Excellent Student (Grades 1–12)

High University Entrance Exam Score Award

Aug 2019

Awarded by Soc Trang Province for achieving a top score in the 2019 National University Entrance Examination.

LANGUAGES

English (Professional working proficiency)
